REMARKS

The present response is intended to be fully responsive to all points of objection and/or rejection raised by the Examiner and is believed to place the application in condition for allowance. Favorable reconsideration and allowance of the application is respectfully requested.

Applicants assert that the present invention is new, non-obvious and useful. Prompt consideration and allowance of the claims is respectfully requested.

Status of Claims

Claims 1 – 33 are pending in the application. Claims 9 – 10, 12, and 25 – 33 have been objected to. Claims 1 – 8, 11, and 13 – 24 have been rejected. Claims 9, 10, 12, 25, 29, and 31 – 33 have been amended.

Claims 1 – 8, 11, and 13 – 24 have been canceled without prejudice or disclaimer. In making this cancellation without prejudice, Applicants reserve all rights in these claims to file divisional and/or continuation patent applications.

Applicants respectfully assert that the amendments to the claims add no new matter.

CLAIM OBJECTIONS

Claims 9 – 10, 12, and 25 – 33 have been objected to on the grounds that they are dependent on a rejected base claim.

Allowable Subject Matter

Examiner stated in the Office Action dated November 15, 2007, "Claims 9 – 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims," and stated that the claims are allowable because "the prior art does not

disclose or make obvious the specific steps/algorithm of controlling the antenna assembly with ASIC." In the Office Action dated April 28, 2008, the claims were listed as being objected to, but no further detailed discussion of the claims was provided. Consequently, claim 9 has been rewritten in independent form. Claim 10 has been rewritten so that it now depends on claim 9.

In the Office Action dated April 28, 2008, claims 12 and 25 – 33 were objected to as being dependent upon a rejected base claim. The allowable subject matter contained in claims 12 and 25 – 33 comprises a CWS (cell-wall socket) used for antenna assembly; any polarization desired by the user. Claims 12 and 25 – 33 have been revised so that they now depend on claim 9 as rewritten, which Examiner had previously stated would be allowable if rewritten in independent form. In addition, a error in grammar that appeared in claims 29, 31, and 32 has been corrected with the removal of the extraneous word "number" from the phrase "integer number."

In view of the foregoing amendments and remarks, the pending claims are deemed to be allowable. Their favorable reconsideration and allowance is respectfully requested.

Should the Examiner have any question or comment as to the form, content or entry of this Amendment, the Examiner is requested to contact the undersigned at the telephone number below. Similarly, if there are any further issues yet to be resolved to advance the prosecution of this application to issue, the Examiner is requested to telephone the undersigned counsel.

Petition For One-Month Extension Of Time Under 37 CFR 1.136(a)

The period for responding to the instant Notice was set to expire on July 28, 2008. Applicant hereby requests that the period for responding to the instant Office Action be extended by one (1) month, so as to expire on August 28, 2008. Accordingly, this response is being timely filed.

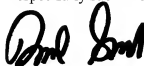

The fee for a Petition for a One-Month Extension of Time is Sixty Dollars (\$60.00) dollars for a small entity. The United States Patent and Trademark Office is hereby
